

**Removing MTB from Gasoline:
Implications for the Northeast Gasoline Supply**

April 2004

The report draws upon discussions of the MTBE Roundtable which was convened by the CONEG Policy Research Center, Inc. and the Northeast Regional Biomass Program to examine how the New York and Connecticut bans on MTBE in gasoline might affect the Northeast region's gasoline supply and distribution system. Volume I reports on the June 2003 discussions among public and private sector Roundtable participants, as well as subsequent interviews and developments. Volume II is the White Paper that was prepared for the Roundtable.
