

FIRST STATE RESOURCE CONSERVATION AND DEVELOPMENT COUNCIL, INC.

NORTHEAST REGIONAL BIOMASS PROGRAM
Providing Direction to a Sustainable Future

BIOMASS COMBINED HEAT AND POWER FOR DELMARVA

Save the Date: June 12, 2007
Modern Maturity Center
Dover, Delaware

The Workshop will begin with a networking breakfast at 7:30 a.m. The program will begin promptly at 8:15 a.m. and conclude by 2:00 p.m. Lunch will be provided.

Topics to be covered include: Biomass Supply, Biomass Combined Heat & Power Technology, and Combined Heat & Power Policy Issues.

Biomass Combined Heat and Power (CHP) is the generation of electricity and the use of heat generation for heating and refrigeration. CHP systems operate at significantly higher efficiencies than conventional utilities, producing energy cost savings. The use of biomass in CHP systems can further reduce energy costs. Biomass fuels also provide an opportunity to decrease greenhouse gas emissions, and create local and regional jobs through markets for forest and woody biomass.

WHO SHOULD ATTEND?

Schools, hospitals, government, industrial facilities, institutional facilities, business managers, facility engineers, school board members, legislators, farmers, arborists, forestland owners

REGISTRATION:

Registration forms can be obtained at any of the websites listed below. Space is limited. A \$25 registration fee will be charged to all attendees.

The Registration Form is posted at:
