Bioheat: A Seminar for the Oilheat Industry in Rhode Island

Why Attend?

Get Informed

- What is biodiesel?
- Has it been tested?
- How does it perform?
- Who is using it?
- What are the benefits?

Industry Development

- What is the status of the oilheat industry's move towards cleaner fuels?
- What role will bioheat play?
- What do customers need to know about bioheat?
- What are the risks?
- What are the benefits?
- What is next?

A New Opportunity

Diminishing fuel quality and competition with natural gas are challenges to the heating oil industry. However, 5 million homes in the Northeast are still heated with No. 2 oil, and natural gas prices are escalating.

An emerging consensus says that market conditions are on the verge of making bioheat a mainstream fuel.

- A new biodiesel federal tax incentive was recently signed into law
- Domestic renewable fuels promote energy security and support America's rural economy
- Climate change and air quality concerns dictate the need for cleaner, renewable fuels

Agenda

9:30	Registration
10:00	Introduction Russell Octeau Oil Heat Institute of Rhode Island
10:10	Biodiesel 101- What is it? Introduction and Technical overview Rick Hanley Northeast Regional Biomass Program
11:30	Supply, End Use & Handling Robert Cerio The Hudson Companies
12:10	What's happening in RI? • Dennis Brennan, Brennan Oil • Curtis Gower, White Fuel • RI Bio-fuels supply grant and buyers groups Erich Stephens People's Power & Light
1:00	Industry Panel Discussion Q & A • Russell Octeau • Robert Cerio • Rick Handley • Curtis Gower • Dennis Brennan
2:00	Adjourn
